ASSEMBLY:

I recommend pinning all the parts in place before starting to sew the parts together. See below where each part will sit.

Attach the eye section across row 8-15 of the head.

Attach the muzzle across rounds 5-8, overlap the muzzle over the bottom of the eye section by one row. Stuff as you go along when sewing.

Attach the mouth just below the muzzle between rounds 2-4 of the head.

Attach the nose to the muzzle above the first row.

Attach the pupils to the white eye section just above the muzzle with a couple of stitches in between. Once sewn in place, using a bit of colour E, make a long stitch from the bottom of the eye up the side to the top and down the other side to make the pupil look more oval shaped.

EDGING OF THE EYE:

2. Now diagonally make 3 sts down in to the centre of row 4 of the white part (swipe to image 9 for guidance).

4. Continue down the outside of the white part a further 10 sts.

Cut off a tail of colour A and fill in the white part at the top of the eye section between the new sts you've just made.
