MATERIALS

Bear knitted from Alize Angora Real 40 yarn (wool 40%, acrylic 60%)

At 100g-480m

Hook 1.25.

The bear is knitted with one piece from the feet to the crown.

Be sure to use the frame to keep the toy

the shape, and most importantly the head, because the bear's neck is very thin.

Start stuffing your foot. Stuff the sock is not strong, there will be shorts

for fingers.

Now cut a piece of wire (I have 35cm) to make a loop, insert it into

foot and around the wire still knock padding.

12p-3sc, decx6., 3sc, = 12p

13p-17p-12sc (5 rows)

18p-10sc, 2sc leave, do not tie to the end of the row.

When we connect with the right foot, then these two loops will be the first

loops.

We tear off the thread. To fill.

Body.

19p- 3sc on the right foot, 6 ch, now we take the left foot and begin

knitting from the remaining non-knit stitches 12sc on the left leg,

6sc on ch., 9sc on the right leg.

20p- 3sc, 6sc by ch., 3sc, (inc, 1sc) x3., 12sc- (3sc on the left

leg + 6sc in the chain of ch., + 3sc in the right leg = 12sc),

(1sc, inc) x3 = 42p

After 20 rows, the thread should be in the center of the right leg, behind.

About the wire. Twist the two wires from the legs together, but

twist only the length of the body plus the neck, in the head two wires should

to be separate.

69p- (11sc, inc) x6 = 78p.

70p- (12sc, inc) x6 = 84p.

71r-78r-84sc (8 rows)

From a wire, make such a structure as in the photo, this is for stability

teddy bear heads. The head is big on a thin neck. Will also help

bend your head to the sides.

From this moment, you can gradually and gently fill your head.

The wire should not touch the head, but be inside it. And around

wire stuffing.

It's better to start stuffing in small lumps, so that gradually

fill the entire head space.

79p-6sc, dec, (12sc, dec) x5., 6sc = 78p.

6p- (4sc, inc) X6 = 36p

Break the thread.

Assembly.

Before starting the assembly, it is necessary to comb all the details. Can

Velcro, you can use a stitch.

To comb very carefully so as not to change the shape of the parts.

You can insert colored pins in the center of the tummy and in the center of the head, so that during assembly you orient yourself and arrange the bear symmetrically.

You can immediately sew a patch on the tummy, this will also help determine with the center of the figure of the bear.

Sew on the muzzle, be sure to add filler, but not much to the muzzle did not stick forward, but as if protruding slightly forward. She

It is not located in the center of the head, but much down. Somewhere from row 65 (or through 6 rows from the neck) and up.

Sew on your ears. The bear's head is not round, and you can see from the sides there are places for ears.

Make a little eye tightening. To do this, insert the needle behind the head at neck and withdraw into the first eye, tighten a little bit, return, then from the neck withdraw into the second eye and back to the neck. Tighten a little and fix the thread.

And because our eyes will be located very close to each other, you can with one stitch to capture the entire area intended for the eyes, and a little pull off, do not pull heavily, otherwise they may look like they failed.

In this embodiment, the eyes will be deepened evenly.

Choose the nose and eyes at your discretion. But it is better that the nose is not small, I have a length of 2.5 cm. If there is no suitable nozzle in size, it's easy to make it from plastic or dump it, but you can find a button and to cover with fabric. There are many options.

The eyes should be placed directly above the muzzle and very close to each other.

Sticks sticking out wire, insert into the body on the sides in the region of 49-50 rows, sew on. Make sure that your hands are symmetrical.

Sew a patch on the tummy on the most convex part of the abdomen, a drop add filler.

Embroider a smile and eyebrows. Embroider a smile in one thread so that it is such is not very noticeable, but eyebrows are better in two strings. Embroider the same toes and toes.

You can tint the bear a little – cheeks, eyebrows.

Cut several threads from the main yarn and string them on the crown heads (where we closed the last loops) as we string fringe.

Cut to desired length and fluff. It will be a forelock.

A bear can be made with a felted face and a felted nose. Eyes make of plastic. Sew on patches.

Bear is ready. And you can decorate it as you wish.
